

▪ mason / reinforced concrete builder	⇒ Constructing the structures of buildings: foundations, load-bearing structures (joists, flooring).
▪ construction plant mechanic	⇒ Maintaining and repairing all vehicles, machines and equipment used on public works sites.
▪ joiner	⇒ Designing, manufacturing and fitting doors, windows, shutters, cupboards, parquet flooring, staircases, etc.
▪ glassmaker and fitter	⇒ Manufacturing and installing glass structures on supports made of metal, aluminium or synthetic products (façades, curtain walls, bow windows, windows, stapled external glazing, etc.).
▪ electrical fitter	⇒ Supplying users with electricity from a production or processing point: installation of lines and maintenance of the equipment.
▪ painter	⇒ Creating the decor (decoration, protection and restoration of components of a building such as the ceilings, walls or panelling) both indoors and outdoors, including on façades.
▪ plasterer – dry liner	⇒ Laying out, isolating and decorating interior spaces: building of ceilings or service shafts which hide the various circuits and partitions, producing coatings (such as decorative coatings or plaster connections), etc.
▪ fibrous plasterer – stucco plasterer	⇒ Building structures made of fibrous plasterboard and stucco for decorative or technical purposes: moulding, rosette, cornice, duct and ceiling.
▪ locksmith - metalworker	⇒ Working with metal to protect and embellish buildings.
▪ floor – carpet fitter	⇒ Protecting and decorating floors and interior walls with miscellaneous coverings.
▪ stone cutter	⇒ Working with stone for building and decorative purposes.
